

Student campus development. *En plein air* 1.0 Summer school

In

Riga Technical University we are confident that development can be improved much better if it is proposed not only from one side of initiators. In other words – to make good decisions you need as many viewpoints as you can. This is why we are looking for passionate young architects who are willing to brainstorm on developing of university campus. **We are welcoming 15 architecture students to join our summer *En plein air* which is dedicated to the topic "Student Campus Architecture. Inspiring Kipsala Island".**

The Summer School aim is to provide support for young future architects as students will be able to develop their practical skills by making architecture sketches. Students will have a chance to share ideas and visions with other participants and experienced, recognized Latvian architects and RTU Architecture Faculty.

This is a great opportunity for students to supplement their portfolios, meet other students from the same field of interest, do networking with future and present architects, experience new cross-culture adventure and spend two weeks in a vibrant, creative environment of Riga city.

**2 WEEKS
6 ECTS**

■ **Please, note that this summer school is funded by the RTU International Cooperation and Foreign Students Department.**

■ Scholarships cover the tuition fee, accommodation, company field trips, entertainment activities and catering (breakfast and lunch during working days).

■ The participants of the summer schools have to cover travel expenses from the country of origin to the summer school location in Latvia themselves.
